■ KPT7050S

## IBGT7050S

## KPT4050S

## IBGT

Mounting of operator panels and DIN-Rail modules

- Installation depth variable adjustable
- Clear plastic cover with IP54 protection and lockable (accordance to 3524E)
- Incl. front plastic cover with customized cutout
- Individual labeling via Resopal or laser engraving of the plastic cover
- DIN-Rail can be mounted in different depth positions
- More space for e.g. operator panels by removing the middle bridge
- M2,5 thread rails (default), M3 optional
- Possible combination of Panel, Controller and 19" modules in one rack

## IBGT4050S

Cover plate  
incl. rated breaking points

## IBGT4084S

DIN-Rail  
variable depth adjustment

## IBGTflex

The IBGTflex system provides the option of tilting DIN-Rail backwards. This allows for simplified wiring.

After wiring, the devices can be locked in the final position.
